FUND COMMENTARY

The Pie KiwiSaver Growth Fund returned 1.3% during the month, bringing it to a 12-month return of 17.9%.

August was certainly a wild ride, with a significant uptick in market volatility after a relatively quiet 12 months. Last month, we noted that the Volatility Index (VIX) rose to its third-highest level (the others being during the GFC and COVID), marking the fastest rise and then equally important, the fastest fall in history. In hindsight, some crowded trades, like Japan (which saw the Nikkei initially crash around 25% before recovering), were not enough to undermine the solid economic fundamentals. This serves as a gentle reminder to never take anything for granted as an investor!

As interest rates fell during the month, our investments into Property, Infrastructure and Fixed Income saw the biggest gains, as they all benefit from falling rates. Additionally, the NZX performed well as a rebound in business sentiment and the promise of interest rate relief spurred some bargain hunting, particularly among property and consumer names. We are actively looking to increase our exposure to NZ companies for the first time in several years. The international funds also reviewed their exposure to China (via global companies), and we have no direct holdings, as we remain concerned about the depth of the property-related slowdown.

Looking ahead to the next three months, it's likely that volatility will remain elevated. We expect the market to become increasingly focused on the US election as we approach November. However, interest rate cuts from central banks and positive GDP growth should provide the markets with enough resilience to navigate the political uncertainty.
