## FUND COMMENTARY

The Pie KiwiSaver Growth Fund returned 2.6% during the month, bringing it to a 12-month return of 14.9%.

Equity markets rebounded in May with major indices in the US and Europe making new all-time highs. The Federal Reserve got the month off to a positive start as they pushed back against the prospect of further rate hikes, which led to an easing in bond yields. A weaker US jobs report and lower-than-expected inflation numbers further allayed fears of overheating, though the market rally stalled mid-month as data outside the US showed further evidence of sticky inflation.

Equities were underpinned by a strong first quarter reporting season in the US, with strong rises in spending on artificial intelligence fuelling optimism for future earnings growth. The fund's best performer was once again Nvidia, which reported another very strong set of figures. Spending on AI chips and infrastructure has not started slowing down yet. Duolingo was the worst performer, falling 15% despite reporting good numbers and raising guidance, as there are market concerns that AI developments could impact its online language learning business.

Trading activity during the month included the sale of Tractor Supply which was near our price target and Salesforce, which subsequently fell sharply lower after reported earnings below expectations. New additions included Swiss pharma company Roche, which we believe is very undervalued given its strong pipeline and leading global diagnostics business.

Going forward, the runway for a soft-landing remains open and an environment of moderate economic growth and inflation should remain supportive for equity markets. Nonetheless, with global economies diverging and the US election looming, we expect there to be bouts of volatility in the coming months, which will create opportunities for active management.
